

Discovery / Inquiry-Based Learning Lesson Plan Template

Skill / Standard Focus	
Learning Objective	
Assessment (How will you know if your students have mastered the learning objective?)	Choose Type: ☐ Diagnostic ☐ Formative ☐ Summative Describe:
Real World Challenge or Problem	
Question - must be objective and open-ended, and should lead the learner to evaluate the situation	
Materials Needed	

Type of Inquiry	☐ Structured Inquiry - Students follow the lead of the teacher as the entire class engages in one inquiry together.	☐ Controlled Inquiry - Teacher chooses the question and the experiment/task students will use to answer the question.
	☐ Guided Inquiry - Teacher chooses the question and the students design the experiment/product/solution to answer the question.	☐ Free Inquiry - Students choose their question along with the design without any teacher support
